UCare to implement new pricing software for UCare Individual and Family Plans claim payments

Starting Oct. 1, 2025, UCare will use a third-party pricing software to calculate pricing on most professional services claims for UCare Individual and Family Plans claims. The new software will apply to all claims processed Oct. 1, 2025, and forward for dates of service on or after Jan. 1, 2025. [UCare already uses the pricing software on its other lines of business](#), such as UCare Medicare Plans, EssentiaCare, Minnesota Senior Health Options and UCare Connect + Medicare. Use of the software will improve payment accuracy and consistency with other UCare products.

Once in place, providers may experience processing and/or pricing changes for UCare Individual and Family Plans claims.
