

-78 Unplanned Return to the Operating/Procedure Room by the Same Physician Following the Initial Procedure for a Related Procedure During the Postoperative Period

Last Reviewed: 3/22/2024

Used to indicate that a related procedure was performed during the postoperative period of the initial procedure (unplanned procedure following initial procedure).

Product Information

The information outlined below applies to all UCare products. Product specific information is outlined below.

Payment Information

[UCare Medicare Advantage, Dual Eligible State Public Programs when Medicare is the Primary Payer and UCare Commercial Products](#)

- The allowed amount is based on the intra-operative percentage listed in the “INTRA OP” field of the CMS Medicare Physician Fee Schedule Relative Value File (MPFSRVF) for services with a 90 or 10 day global period.
- A new postoperative period **does not** begin when using the -78 modifier.

[MHCP \(When MHCP is the primary payer for the service\)](#)

- For all UCare Medicaid/MHCP products when the -78 modifier is appended to an eligible service, payment will be made at 76% of the base allowed amount.
- A new postoperative period **does not** begin when using the -78 modifier.

Appropriate Use

- The -78 modifier describes a related, yet unplanned return to the operating room or procedure room during the global period of the initial procedure by the same physician.
- The -78 modifier is only valid when billed with surgical codes and the procedure is performed within the global period of the initial procedure.

Inappropriate Use

- When the surgery performed is unrelated to the initial procedure.
