PAYMENT POLICY INSTRUCTIONS

This payment policy is intended to provide a foundation for system configuration, work instructions, call scripts, and provider communications. A payment policy describes the rules for payment, which include applicable fee schedules, additional payment rules by regulatory bodies, and contractual terms. This policy is a general guideline and may be superseded by specific provider contract language.

Based on current guidelines, providers must spend more than half the time of a time-based code performing the service to report the code. If the

time spent results in more than one- and one-half times the defined value of the code, and no additional time increment code exists, round up to the next whole number. Outlined below are the billable units of service based on whether the description of the service includes the unit of measurement of 15 minutes or 60 minutes:
